The stock market was more active than usual of late, while the tone was stronger than for some time, resulting in material gains over the entire active list and some sharp advances in a few of the leading shares. The "bulls" were more courageous and aggressive than for many weeks, and the Western operators, as well as London, were buyers of their favorites, the former being specially courageous in view of the very flattering crop conditions, which are now receiving their due attention from all classes of operators. The market opened with small fractional gains over last night's figures, extending to 58 per cent., and while there was some hesitation on selling of some "short" stocks in Union Pacific, the tone was soon recovered and an upward movement was inaugurated, which, with but slight interruption, lasted throughout the session. Missouri Pacific early took the lead in the advance, but later the grangers and Union Pacific came to the front again and especially sharp gains were made in the last half hour. The bank statement when issued showed only slight loss in renot so apparent as expected and there was a rush to buy on the strength of the statement, which moved up all the leaders with more animation and Union Pacific specially scored a handsome gain. The upward movement also extended to a large number of specialties and the market broadened out materially, some instances showing advances of over 2 per cent. The market finally closed active and strong at the

TRADING AT CHICAGO.

Operators Seized With a Panie to Buy-Rye Gains 30 Cents on the Week.

CHICAGO, Aug. 15 .- The local dealers in ereals completely lost all control over the wheat, corn and rye markets this morning. and many times during the day they clearly lost control over themselves. No such excited scrambles have been seen in the Chleago wheat pit since Hutchinson ran his corner in that cereat in the fall of 1888. Outside dealers were as much at sea as the Chicago speculators. Hundreds of messages were received by commission men from clients in the country inquiring "what do you think of the market?" but the blind could not lead the blind, so each one was allowed to grope for himself. The story is only barely indicated by the closing quotations, which show 65sc advance in wheat,

Se in rye and 2340 in corn. The excitement which characterized the trading yesterday was quadrupled at the opening to-day. December wheat that was being traded in at 997sc at 1:15 o'clock yesterday was wanted by hundreds of bellowing "bulls" and roaring "bears" at from \$1.0158 to \$1.0314 the moment the bell tupped for the opening of trade, at 9:30 o'clock, this morning. Business for about one minute was done on an enormous scale at from \$1.03 to \$1.023, and then for a matter of five minutes the crowd was unanimous to sell and the price tumbled to \$1.015s. Its stay at the latter point was short, the same unanimity which had a few minutes before been in favor of the selling side now changed and it rose to \$1.02, at which point sellers entirely withdrew until apparently crazy buyers had advanced the price to \$1.05. Some sales at the time were made as high as \$1.0514 before it once more began to recede. The reaction following the latter bulge stopped when it had got down to \$1.0334. The market acted exceedingly firm, with an upward trend, reaching to \$1.04 a few times, and then, as on the preceding bulge, the entire pit full of operators, haggard and excited brokers, yelled their bids, and as nothing but higher and still higher prices could induce anyone to sell, bids of \$1.05, \$1.06, \$1.07 and finally \$1.08 were thundered almost simultaneously from husky throats with very little grain secured as the price shot up. There was a feeling that after such a panicky advance the worst was over for the "shorts" for this eventful day at bast. Comparative quiet soon succeeded and the price once more began to sag, but short" sellers had received such a cruel experience in the earlier stages that the galy parties who offered grain towards close were those who had it previously bought and thought well of the profit offered to them. Many of the most excited traders could not give a coherent account of the cause of all the turmoil, but sifted of the whirling clouds of dust which obscured everything except the fact that the market was in a tremendous state of nervous panic, the situation seemed to be the result of the domestic and foreign markets being all feverishly higher. The short rye crop in Russia, the excitement in the German rye market over the Russian prohibition of rye experts, a report that the cereal crop of Austria-Hungary was heavily deficient and the shortage in the wheat crops of France and India, all pointed to a shortage in the word's breadstutis. London was up is on cargoes for prompt shipment. Liv-erpool was 1@2d higher, and quoted strong and advancing. Then a report was put in circulation that James R. Keene, of New York, backed by a big Eastern syndicate, was running a "bull" campaign in wheat. The memory of his last corner here in 1877-78, when he held wheat up in the neighborhood of \$1.40 for a

ports from New York that foreigners were selling heavily caused a change of senti-ment. Wheat was thrown overboard in blocks, and the price broke as indicated above. This was near the opening. By the time \$1.08 was reached the excited shonters began to lose their breath, and to realize that the "short" Saturday session ending at noon was drawing to a close, and that it would be a good thing to even up trades in view of the intervening Sunday. During this process December declined to \$1.0512, gradually recovered and closed at

At various times during the day it was said that B. F. Hutchinson was again in the saddle; that he had been right on wheat and corn for some time and that he had made a lot of money and was giving the boys in the pit another taste of his tactics.

It was also given out that Pardridge, after his recent heavy fall, had again plucked up courage to enter the fray and that he had been a heavy seller above \$1.03.

This would have been an exciting day for

speculators in grain if even wheat had remained stationary. Corn was only of sec-ondary interest to-day because, as a rule, the crowd trading in it is smaller than that in wheat. The fluctuations were frequent and of sufficient severity to be called sensational, and, as in wheat, the trend of prices was strongly upward. September, which at one period of the session sold as low as 5934c, only reached its pinnacle when it touched 6512c, and it stood at 6212c at the close of the session, or 2310 above the point it stopped at yesterday. The advance was due for the most part to the excitement in the wheat market, and that was taken advantage of by those who are working the "bull" side of the deal. It was said that Hutchinson, now in New York, was on the "bull" side of the corn

Oats hardly kept pace with other cereals, the net gain amounting to only 34@7gc. The news of the German excitement in rye set the market to jumping here. No. 2 cash, starting at 97c, sold up to \$1.04, closing at \$1.0312. September started at 99c and sold up to \$1.04. During the past week there has been 30c advance, and yet the demand is unabated. Since yesterday's closing each rye advanced 10c, August 10c, September 8c and October 812c. The provision market was firm, but ap-

peared to draw its support mainly from the tremendous advance in corn and wheat. The receipts of hogs were lighter than had been looked for and the prices higher, which was the only other independent source of strength. The opening prices showed considerable advances. After half of that early gain had been dropped there was another and a heavier advance toward serves and cash held, while deposits were | the middle of the session, but in the end increased materially. The effect of the | the price worked back to about the opensince yesterday are: Pork, 1712@25c; lard, .05@.0712c; ribs. .05c. The leading futures

INDIANAPOLIS MARKETS.

A Week in Which Trade Has Been Quiet and Fluctuations in Values Few. INDIANAPOLIS, Aug. 15.—Trade in the week closing to-day was not disappointing, for a light business had been anticipated. The most striking feature about the situation is the steadiness in prices, and the problem with the merchants, both wholesale and retail, is whether such firm prices when business is slow does not mean higher prices when business becomes more active. In no line of dry goods or groceries is there any indication of a weakening in prices. The flour, the provision and pro-Eggs, poultry and butter are firm in tone, the demand taking all receipts readily, unless of inferior quality. Naturally with so large a supply of fruits and vegetables weak prices prevail, but no lower than usual when harvests are bountiful. The seed market is more active at unchanged

There is more activity in the local grain market than has characterized it in August for some years. ## Reasons Why

Dr. Price's Delicious Flavoring Extracts of Lemon, Vanilla, etc., Are Superior to All Others. . . .

They are prepared from the choicest and purest materials.

They contain no poisonous oils or ethers.

They are highly concentrated. They are more economical as they require less to flavor.

No delicacies are ever spoiled by their use. They impart the true flavor of the fruit from which they are made.
